

SMART INDIA HACKATHON 2025

Krishi-Parinidhi

- **Problem Statement ID – SIH25126**
- **Problem Statement Title- Student Innovation**
- **Theme- Agriculture, Food-Tech and Rural Development**
- **PS Category- Software**
- **Team ID-**
- **Team Name - Krishi-Parinidhi**

- **Crop Alert System:** predict & warn against overproduction.
- **Krishi Visheshagya** upload state-wise crop data.
- **Exclusive crops** (avocado, blueberry, dragon fruit).

Historical Data

1. Smart Crop Allocation:
Preventing Overproduction

KRISHI VISHESAGYA
Analysis

Optimized Crop Mix,
Stable Market Prices,
Increased Farmer Income

Data-Driven Crop
Optimization

Harhit Godha Model
& Climate Adaption

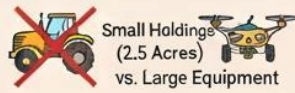

**2. Introducing High-Value &
Climate-Resilient Crops**

Research, Training
& Pilot
Programs

Miniaturized,
-Functional
Tools

Crop Diversification &
Innovation

Small Holdings
(2.5 Acres)
vs. Large Equipment

3. Right-Sized Technology:
Maximizing Per-Acre Yield

New Reduced Risk.
Enhanced Soil Health

New Revenue Streams,
Enhanced Soil Health

Increased Efficiency,
Multi-Crop Cultivation,
Higher Productivity

Precision Farming for Small
Landholdings

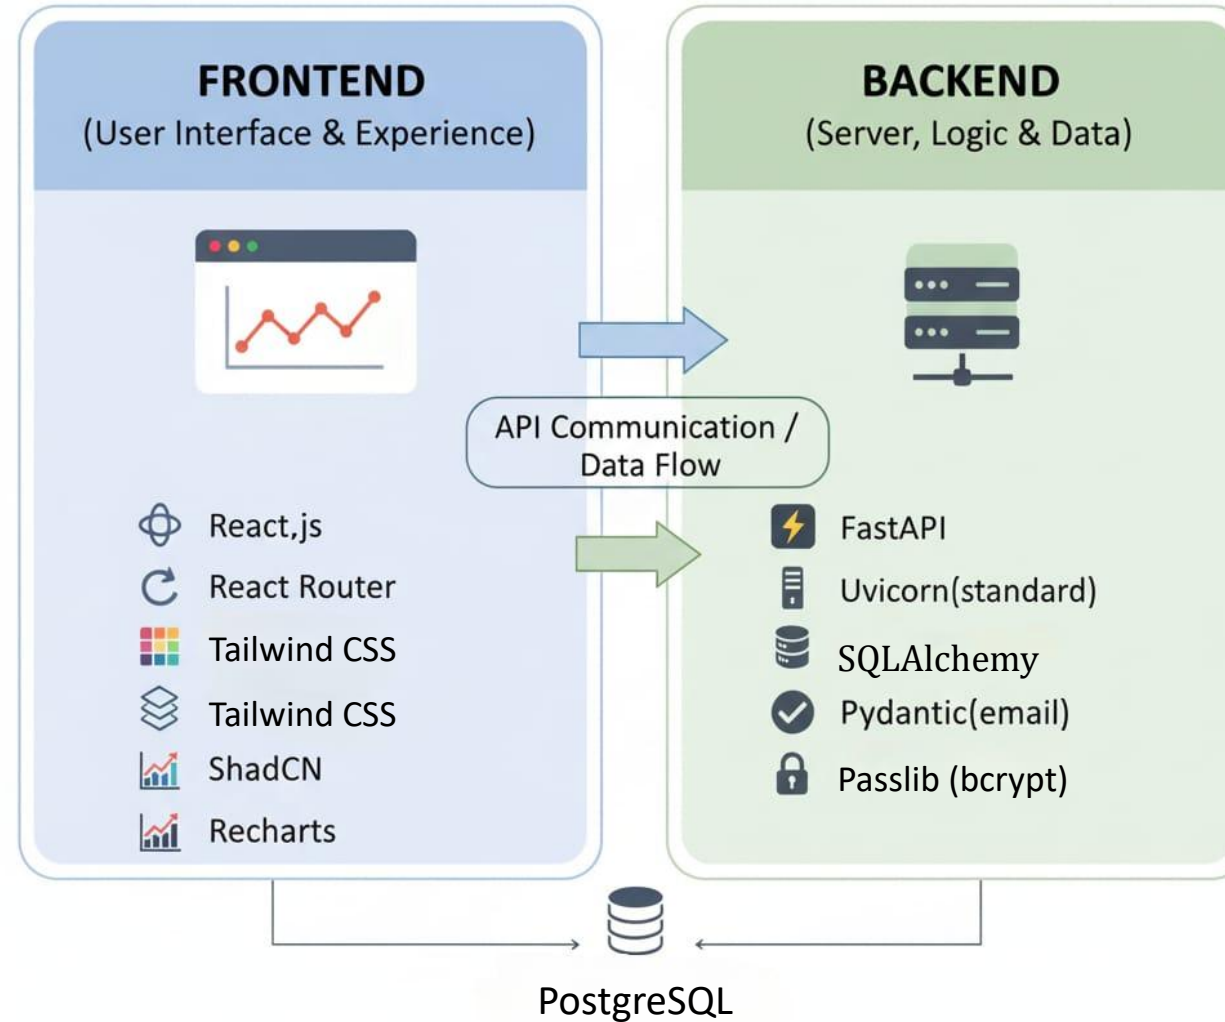

- **Pilot-tested farming models** for new crops
- **Lease-based modern equipment** → no upfront cost
- **Farmers sign yield-based repayment bonds** with govt.

Enhanced Farmer Welfare & Sustainable Economic Growth

TECHNICAL APPROACH

Frontend & Backend Architecture

- **Data Collection – Krishi Visheshagyas collect & upload state/district-wise crop data (past & present).**
- **Data Analysis – Use AI/ML models to predict overproduction trends & market demand.**

- **Nationwide Alerts – Farmers get SMS/app notifications in local languages about crop surplus risks.**
- **Downsizing/modifying machinery for 2.5-acre avg Indian farms.**

FEASIBILITY AND VIABILITY

KRISHI
PARINIDHI

IMPACT AND BENEFITS

- Farmers earn stable incomes, reduce debt
- Exports rise with exotic high-value crops
- GDP growth through agriculture boost
- Youth see farming as profitable career
- More jobs: Krishi Visheshagyas, agri-tech workers
- India moves from survival farming → profitable farming
